

# Small Animal Ultrasound

Ultrasonography in veterinary practice will become as common as running a CBC! Make your investment in equipment worthwhile by understanding the full potential of this valuable service.

This course is **designed** for those **practitioners and technicians** who have never used an ultrasound machine before! It covers the essentials of practice-based ultrasound including primarily abdominal applications with an introduction to echocardiography.

The format for this four day course is split 50-50 between lecture and small group hands-on wet labs.

## Synopsis

- Ultrasound procedures and technique for examination of the small animal patient
- Viewing the spleen, urinary tract (including kidney, bladder, prostate), reproductive organs, liver and GI tract
- Biopsy technique and other invasive ultrasound
- Gastrointestinal, Pancreatic, Adrenal, Thoracic, Lymph Nodes, Head and Neck, Tendon and Musculoskeletal Ultrasound

**Cancellation Policy:** 90% refund will be issued for cancellations up to 60 days prior. No refunds will be issued after that date except under special circumstances, when the maximum refund is 50%. Lifelearn reserves the right to cancel the course, in which case a full course refund only will be paid. **NB: Please do not make flight reservations until the course is confirmed.**

## Speaker

Stephanie Nykamp DVM, Dip ACVR
